

# **PCJ DRIPPER**

COMPACT ON-LINE PRESSURE-COMPENSATING, CONTINUOUSLY SELF-CLEANING DRIPPER

#### **APPLICATIONS:**

- Greenhouses, nurseries, citrus,
- Orchards, deciduous and tree irrigation

#### **SPECIFICATIONS:**

- Recommended filtration: 130 micron / 120 mesh.
   Filtration method is to be selected based on the kind and concentration of the dirt particles existing in the water.
   Wherever sand exceeding 2 ppm exists in the water, a Hydrocyclon filter is to be installed before the main filter.
   When sand/ silt/ clay solids exceed 100ppm, pre treatment will be applied according to Netafim™ expert team's instructions.
- TurboNet<sup>™</sup> labyrinth with large water passage.
- To be "inserted" into thick-walled pipes (0.9, 1.0 and 1.2 mm.)
- Injected dripper, very low CV.
- 3 different outlets: nipple, barb to 3mm. ID and barb to 4 mm. ID micro-tube.
- UV resistant. Resistant to standard nutrients used in agricultural.
- PCJ on-line drippers meet ISO 9261 Standards with production certified by the Israel Standards Institute (SII).

#### **FEATURES AND BENEFITS:**

- Pressure compensated: Precise and equal amounts of water are delivered over a broad pressure range. 100% uniformity of water and nutrient distribution along the laterals.
- PCJ-LCNL & PCJ-HCNL with Anti-drain (LCNL & HCNL): Eliminates drainage and refill effect, and improves efficiency
  in pulse irrigation
- Continuously self flushing: Flushes debris as it is detected, throughout operation, not just at the beginning or end of
  a cycle, ensuring uninterrupted dripper operation.
- TurboNet<sup>™</sup> labyrinth assures wide water passages, large deep and wide cross section improves clogging resistance.
   Widest water passages within the dripper.
- Dripper can be positioned exactly where required.
- Number of drippers can be increased so as to increase water quantity supply aimed at meeting tree growth rate requirement.
- Allows the installation of "spider assembly", splitting the drip supply into a number of drip outlets.
